Re: 7110 C Wood-Fired Room Heater Model; Certificate of Compliance Number 411-26

Dear Mr. Nielsen:

I am pleased to inform Morsø Jernstøberi A/S that the above-referenced wood heater model has been approved for certification pursuant to the 2015 New Source Performance Standard (NSPS) for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces at 40 CFR Part 60, Subpart AAA (2015 NSPS) by the United States Environmental Protection Agency. Certification under the 2015 NSPS is valid through April 9, 2031. This letter serves as your wood heater Certificate of Compliance. Please refer to the above-referenced Certificate of Compliance number in all future correspondence.

Based on a January 8, 2025¹, test report prepared by Services Polytests Inc. demonstrating compliance with the EPA Test Method 28R and the ASTM International Test Methods E2780 and E2515 as well as Alternative Test Method (ATM) ALT-154², and the information provided in your February 6, 2025, application, the above-referenced model is certified as meeting the

¹ Revised on October 30, 2025, and February 19, 2026.

² December 13, 2024, (revised on January 21, 2025), letter from Steffan M. Johnson, Group Leader, Measurement Technology Group, Office of Air Quality Planning and Standards to Ken Morgan, Technical Services Director, OMNI-Test Laboratories, Inc., approving the use of an ATM for demonstrating compliance with the filter weighing procedures as outlined in ASTM E2515-11. A copy of the letter can be found on page 422 and https://www.epa.gov/system/files/documents/2025-01/ken-morgan-astm-e2515-particulate-filter-weighing-broadly-applicable-test-method-request_modified-to-qqqq.pdf.

2015 NSPS. Under the 2015 NSPS and based on PFS-TECO's February 10, 2025³, Certification of Conformity, the model's emission rate of 1.5 g/hr meets the 2020 NSPS particulate matter emissions limit of 2.0 g/hr. The heat output range and overall heating efficiency for the above-referenced model are 12,729 – 23,449 BTU/hr and 73%, respectively. This model line's carbon monoxide emission rate is 1.1 g/min.

This Certificate of Compliance is valid for the above-referenced model and cannot be transferred to another model line without applying for another Certificate of Compliance. This Certificate of Compliance allows you to advertise and sell the above-referenced model through April 9, 2031. Thereafter, you may not advertise for sale, offer for sale, or sell wood heaters under this Certificate of Compliance without applying for and obtaining another Certificate of Compliance.

All wood heaters manufactured or sold under this Certificate of Compliance must comply with the EPA labeling requirements found at § 60.536. These provisions require each wood heater to have a permanent label affixed to it, including the month and year of manufacture, model name or number, serial number, certification test emission value, test method, standard met, and compliance certification statement.

In addition, you must comply with all applicable requirements of the regulation, including:

1. Conducting a third-party certifier-approved quality assurance program which ensures that all units within a model line are similar to the wood heater submitted for certification testing in all respects that would affect emissions and are in compliance with the applicable emission limit, pursuant to § 60.533(m);
2. Applying for recertification whenever any change is made to the above-referenced model that affects or is presumed to affect the particulate matter emission rate for the model line, pursuant to § 60.533(k)(1);
3. Providing an owner's manual that includes the information listed in § 60.536(g)(1) with each affected wood heater model offered for sale;
4. Placing a copy of the full non-Confidential Business Information (non-CBI) certification test report and summary of the test report on the manufacturer's website and available to the public within 30 days after the EPA issues a Certificate of Compliance, pursuant to § 60.533(b)(12). The up-to-date non-CBI certification test report and summary (if later revised) should remain posted on the manufacturer's website for as long as the model line is manufactured and/or offered for sale in the U.S.;
5. Submitting a report to the EPA every two years following issuance of a Certificate of Compliance for each model line. This report must include the sales for each model by

³ Revised on November 3, 2025, and March 5, 2026.

state and certify that no changes in the design or manufacture of this model line have been made that require recertification under § 60.533(k);

6. Retaining records and submitting reports as required at § 60.537; and
7. Submitting wood heaters for audit testing if selected by the EPA under §§ 60.533(n)(1)(i) and (2)(i).

Failure to comply with these requirements may result in revoking this Certificate of Compliance and enforcement action, including penalties as specified under the Clean Air Act. Pursuant to the EPA-approved ATM ALT-154, you must also include your approval letter in the certification test report for posting on your website. To promote transparency in implementing the Wood Heater Program, we request that manufacturers submit a copy of the Uniform Resource Locator (URL) or web address where the non-CBI certification test report is posted to WoodHeaterReports@epa.gov within ten (10) days of posting.

Once the EPA has verified that the full non-CBI certification test report has been posted on the manufacturer's website, the Agency will add the above-referenced model to the [EPA-Certified Wood Heater Database](#).

If you have any questions concerning this letter, please contact the Wood Heater Program at WoodHeaterReports@epa.gov.

Sincerely,

Jacqueline Robles Werner
