Item no. 54908000

Portable heat with iconic Morsø design

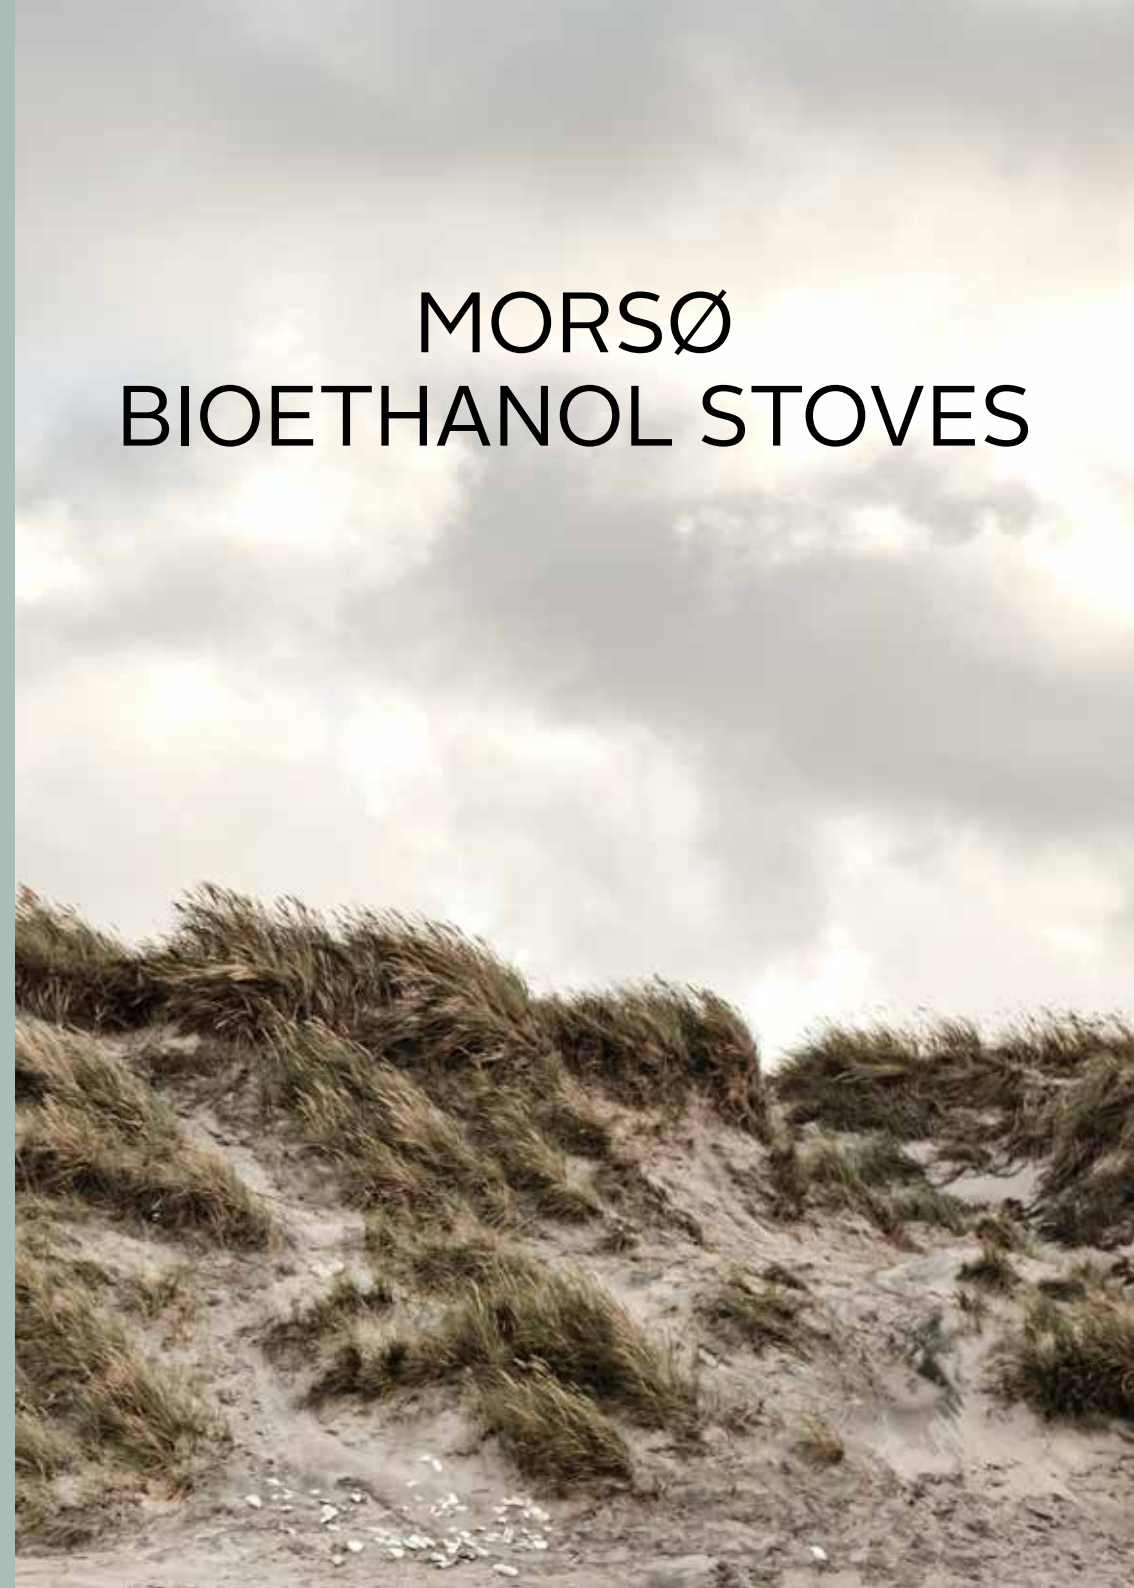

The Morsø 1010, Morsø 3116, and Morsø Ø4 bioethanol stoves are the first three models in Morsø's range of beautifully designed cast-iron and steel stoves powered by bioethanol—a flexible, smokeless heating solution that combines design, coziness, and portability.

- Easy installation. Requires neither a chimney nor flue piping
- Clean burning. Runs on bioethanol and produces neither smoke nor ash
- Easy to use. No firewood and no ash
- Flexible design. Available in various sizes and models suitable for both permanent homes and holiday cottages
- Supplementary heat source. Provides pleasant room heating and genuine coziness

The design of the bioethanol stoves remains true to Morsø's classic aesthetic and quality; the solid cast iron used in the Morsø 1010 and 3116 models, for instance, not only ensures optimal heat distribution but is also a durable and 100% recyclable material.

All Morsø bioethanol stoves offer a burn time of up to 5 hours on just 1.5 liters of bioethanol.

MORSØ BIOETHANOL STOVES

Morsø 1010 Bioethanol Stove

Rib sides - 250mm legs
Item no. 64908001

Squirrel sides - 250mm legs
Item no. 64908007

Rib sides - 100mm legs
Item no. 64908009

Squirrel sides - 100mm legs
Item no. 64908008

Type: Freestanding
